

ReportsLogsBase

```
classDiagram
    class ReportsLogsBase {
    }
    class Postbacks {
        + __init__()
    }
    ReportsLogsBase <|-- Postbacks
```

The diagram illustrates a class hierarchy. At the top is the 'ReportsLogsBase' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name, while the two bottom sections are empty. Below it is the 'Postbacks' class, also a rectangle divided into three horizontal sections. The top section contains the fully qualified name 'tune.management.api.advertiser.stats.postbacks.' followed by the class name 'Postbacks'. The bottom section contains the method signature '+ __init__()'. A blue arrow with an open triangular head points from the top of the 'Postbacks' class to the bottom of the 'ReportsLogsBase' class, indicating that 'Postbacks' inherits from 'ReportsLogsBase'.

tune.management.api.advertiser.stats.postbacks.

Postbacks

+ __init__()
